

IRWAN DHARMAWAN

Lead UI/UX Engineer | Rapid Code-Based Prototyper

Jakarta, Indonesia (Open to Remote) | irwan1010@gmail.com | +62 8787 3116901

Portfolio: RapidUI.dev | LinkedIn: linkedin.com/in/irwandharmawan | GitHub: github.com/inesia

PROFESSIONAL SUMMARY

With a strong technical foundation and a focus on speed and efficiency, I specialize in Rapid Code-Based Prototyping (HTML/CSS/Next.js). I don't just design interfaces; I code functional prototypes directly to validate design concepts accurately and accelerate the product development lifecycle. Having engineered the UI/UX architecture for diverse, large-scale sectors—ranging from B2B enterprise banking systems to massive digital media ecosystems—I leverage modern workflows to bridge the gap between design visions and technical execution, minimizing handoff friction and reducing iteration cycles.

CORE COMPETENCIES & TECH STACK

- Design & Architecture:** UI/UX Engineering, Enterprise Dashboard Design, Scalable Design Systems, Wireframing, Cross-functional Collaboration.
- Front-End Prototyping:** Next.js, React, Tailwind CSS, HTML5, CSS3, JavaScript, Capacitor (Mobile UI).
- Tools:** Figma, Adobe Photoshop, Adobe Illustrator, Git.

SELECTED ENGINEERING EXPERIENCE

Independent UI/UX Engineer & Prototyper

2021 – Present

Remote / Freelance

- Cross-Platform Wellness Application (Wellnooz):** Spearheaded the rapid code-based prototyping for a modern wellness app. Utilized React 19, Tailwind CSS v4, and Capacitor to deliver a pixel-perfect, highly interactive cross-platform UI experience that dramatically accelerated backend API integration.
- Enterprise Media Ecosystem (Promedia Group):** Engineered the scalable UI/UX architecture for a massive digital media ecosystem supporting over 1,300+ independent publishers. Delivered production-ready UI components to ensure seamless performance and a unified design system across a high-traffic network.

- **Web3 & Esports Ecosystem (Eizperchain):** Designed the Website UI, NFT Marketplace interface, and Eizper Esports Mobile Apps, translating complex blockchain and gaming mechanics into intuitive user experiences.

Lead UI/UX Engineer / Chief Operating Officer

2014 – Present

PT Aplikasi Media Nusantara / Jakarta, Indonesia

- Led the end-to-end UI/UX engineering lifecycle, acting as the principal architect for digital product development, including the successful launch of the automotive news portal www.otojurnalisme.com.
- **B2B Banking Solutions (Bank BSI/BSM):** Designed and developed specialized B2B digital platforms, specifically creating the UI for the Business Value Chain system and the Go-UMKM portal to empower local enterprises and streamline business operations.
- **Enterprise Corporate Clients:** Managed and optimized the UI/UX interfaces for major automotive brands, including Federal Oil and Honda Community, focusing on brand consistency and high user engagement.
- Established design systems and streamlined the design-to-development handoff process to ensure high-quality, scalable, and responsive digital products.

Web Designer & Special Staff

2011 – 2014

PT Digital Otomotifindo (Kompas Gramedia Group) / Jakarta, Indonesia

- Maintained and developed internal and client websites (otomotifnet.com), focusing on UI improvements and digital activations.

Web Designer

2007 – 2011

PT Agranet Multicitra Siberkom (detik.com) / Jakarta, Indonesia

- Executed web design, maintenance, and development for internal digital assets and microsite digital activations for one of Indonesia's largest news portals.

ADDITIONAL PROJECTS

- **Move-On Apps:** Conceptualized and designed the UI mockup for a move-to-earn fitness tracking application.
- **Inkindo DKI Jakarta (SIP & Mobile Apps):** Designed the portal and mobile application interfaces for consultant member services.
- **iBridge Portal:** Designed the platform bridging professionals for companies and expert talents.

EDUCATION

- **Bachelor's Degree in Economics (Management)**
- Leveraged a strong analytical background in economics to transition successfully into a self-taught, highly specialized career in Information Technology, Digital Communication, and UI/UX Engineering.
